

The Central Texas Amateur Radio Club provides Amateur Radio support and service to a multi-county area here in the Central Texas Region. Though we are based out of Bell County, our members, have a desire to participate in Emergency Communications, Skywarn Weather Nets, Storm Spotting, and other similar Amateur Radio services, consist of Amateur Radio Operators from all surrounding counties. We provide training and testing for those who wish to get into the great hobby of Amateur Radio. The Technician class, the entry-level course for certification, has a better than 95% first time pass rate!

The W5BEC Repeater Coverage Map

W5BEC – 147.140 PL 123.0

During Severe Weather events, the W5BEC Repeater is directly connected to the Fort Worth National Weather Service via Echo-Link, which greatly aids the National Weather Service in having positive ground truth during severe weather events across Central Texas.

For additional information on the Central Texas Amateur Radio Club, Emergency Communications, Skywarn Weather Nets, Amateur Radio, membership and training, contact:
